

GRANT SUMMARY

Completed Grant Summaries are made available to the public on the State Water Resources Control Board's (SWRCB) website at <http://www.waterboards.ca.gov/funding/grantinfo.html>

Use the tab and arrow keys to move through the form. If field is not applicable, please put N/A in field.

Date filled out: June 4, 2006

Grant Information: Please use complete phrases/sentences. Fields will expand as you type.

1. **Grant Agreement Number:** 05-227-550-0

2. **Project Title:** Tomales Bay Watershed Integrated Coastal Watershed Management Plan

Project Purpose - Problem Being Addressed:

In 2004, the TBWC completed the Tomales Bay Watershed Stewardship Plan which addressed a limited number of management issues. As noted in the Stewardship Plan, the communities and developed areas in the project area support more than 14,000 residents. Resultant contamination of surface water in the watershed results from three primary sources – nonpoint agricultural runoff, septic system leachate, and pollutants in stormwater runoff. The intent of ICWMP project is to expand upon the results of the 2003 Stewardship plan to address additional watershed management topics as identified in the state integrated planning guidelines

The ICWMP seeks to identify solutions for problems related to storage, reliability, delivery, water quality, conservation and associated impacts on natural resources. Ultimately, this project is aimed at developing a prioritized project list for infrastructure improvements, management options, stakeholder activities and other options for reducing pollutant loading in surface waters and, hence, contamination of receiving waters due to septic and stormwaters. Evaluation of nonpoint sources from agricultural operations is not a part of this project.

The receiving waters in this watershed that are of particular concern are four Areas of Special Biological Significance (ASBS); (Bird Rock, Point Reyes Headlands Reserve and Extension, Double Point, and Duxbury Reef Reserve and Extension) and three Critical Coastal Areas.

The ICWMP will also include three supplemental reports: Septic Solutions Report, Municipal Stormwater Assessment and Recommendations Report and an Areas of Special Biological Significance Watershed Assessment. These three reports will be appended to the ICWMP and will provide additional technical and public input to assist in the identification of key management issues and a prioritized project list for the ICWMP.

4. Project Goals

a. Short-term Goals:

- Complete the ICWMMP and prepare a list of prioritized projects which can be the subject of ongoing implementation by affected stakeholders and agencies
- Identify community-supported septic management solutions for selected communities (Inverness, Woodacre, San Geronimo Valley)
- Document stormwater outfalls and develop maps of the complete municipal stormwater/storm drain system in selected communities (Point Reyes Station, Woodacre and Tomales)
- Conduct source area assessment (i.e., water quality monitoring) for the communities of Point Reyes Station, Woodacre and Tomales.
- Conduct initial assessment of watershed function, source areas, and discharges to the coastal Marin ASBS areas (Duxbury Reef, Double Point, Point Reyes Headland and Bird Rock)

b. Long-term Goals: <ul style="list-style-type: none"> ▪ Enable the TBWC members (both agencies and organizations) to work collaboratively to identify and implement solutions for known problems within the watershed ▪ Enable the TBWC to successfully pursue grant funding for implementation of key prioritized projects 	
5. Project Location: (lat/longs, watershed, etc.) Tomales Bay Watershed	
a. Physical Size of Project: (miles, acres, sq. ft., etc.) Entire watershed	
b. Counties Included in the Project: Marin	
c. Legislative Districts: (Assembly and Senate) 06 – Marin (senate and Assembly)	
6. Which SWRCB program is funding this grant? Please "X" box that applies.	
<input type="checkbox"/> Prop 13 <input type="checkbox"/> Prop 40 X <input type="checkbox"/> Prop 50 <input type="checkbox"/> EPA 319(h) <input type="checkbox"/> Other	
Grant Contact: Refers to Grant Project Director.	
Name: Neysa King	Job Title: Watershed Coordinator
Organization: Tomales Bay Watershed Council	Webpage Address: tomalesbaywatershed.org
Address: PO Box 447, Point Reyes Station, CA 94956	
Phone: 415/868-9081	Fax: 415/868-1202
E-mail: tbwc@horizoncable.com	
Grant Time Frame: Refers to the implementation period of the grant.	
From: 1/06	To: 6/08
Project Partner Information: Name all agencies/groups involved with project. See attached table	
Nutrient and Sediment Load Reduction Projection: (If applicable) N/A	

Please provide a hard copy to your Grant Manager and an electronic copy to your Program Analyst for SWRCB website posting. All applicable fields are mandatory. Incomplete forms will be returned.
